WHOLESALE PRICE LIST

1931-1932

Overlook Nurseries

S. IMURA

K. SAWADA

BOX 114, R. F. D.
CRICHTON, ALA.

Nurseries on Moffat Road, 8 Miles Northwest of
Mobile Court House

Shipping Point, Express Shipment, Mobile, Ala.
Car-load Shipment, Orchard, Ala.

TERMS OF SALE

TERMS—

1. Cash. For cash with order five per cent (5%) allowance and packing free, which means you earning about 12%.
2. C. O. D. One-fourth of the purchase amount to be paid by cash with order, balance on delivery at destination. In case of parcel post shipment and your remittance insufficient to cover the postage, the postage shall be subject to C. O. D.
3. Charge Accounts. Our terms were heretofore strictly cash only, but to help present financial situation, we open this season charge accounts which may be opened upon receipt of bank and trade references, allowing sufficient time for investigation; if found satisfactory 30 days net, packing at actual cost being charged (accepting the suggestion made by the last convention of Southern Nurserymen's Association).

PRICES—

5, 50 and 500 of same variety and size at 10, 100 and 1000 rates respectively. No order of lining out stock less than 5 in same variety and size thanked for.

TRANSPORTATION—

State whether order is to be shipped by parcel post, express or freight. When no instructions are given, shipment will be made, using our own judgment. Our responsibility ceases upon delivery to forwarding companies; claim for losses or damages must be made upon the latter.

ALL QUOTATIONS are for immediate acceptance, subject to stock being sold. We shall not be subject to any liability should injury befall stock from freeze, fire or any other cause beyond our control.

WE GUARANTEE all stock sent out to be well grown, healthy, true to name and properly packed. Our liability under the foregoing guaranty is limited in amount to original price received.

CLAIM—If, by any possibility, errors should occur, they will be promptly rectified, if claim is made immediately after the receipt of the goods.

TO OUR CUSTOMERS

We take this opportunity to sincerely thank you for your support of our business, which has been growing very rapidly year after year. In return we have constantly offered stock of highest quality with best service for lowest price possible. To meet your demand satisfactorily our capacity has been enlarged, and efficiency increased every season; yet we see it takes more ground and space than we have now prepared for the next season, as our propagation of both Coniferous and Broad-leaved Evergreens has turned out more successful than our expectation. We must vacate, therefore, some particular patches without delay, and have decided to dispose of some of the stock at real bargain prices. For this reason (and not to compete against the other nurseries) we offer in this catalogue much reduced prices; some of them probably below cost. Hope our customers, old and new, will take advantage of this opportunity and give us orders which will be filled with quality, service and value, together with promptness.

Thanking you again for your past patronage and soliciting your further orders in future, we beg to remain,

Yours very truly,

OVERLOOK NURSERIES.

LINING OUT STOCK

Plants under this heading may be the one growing in the field, in plant bed under lath shade, in cutting bed, in seed bed, or in pot.

All plants, with exception of potted ones, will be carefully dug in bare root, trying not to injury any part of it, puddled immediately and packed with properly moistened moss, so as to reach destination fresh with original dampness. Plants in pots are to be taken out of the pots and wrapped separately in paper, giving all original dirt. However, if so preferred dirt may be shaken off and wrapped in paper with moistened moss. The work will be done with our utmost care that customers will receive the plants in just same conditions as shipped with dirt. So doing you save much on expressage.

REMARKS: (C) indicates from Cutting; (S) Seedlings; (G) Grafting; (T) Once Transplanted; (TT) Twice Transplanted.

LINING OUT CONIFERS

(Thousand Rate on Application)

ABIS FIRMA (Japanese Fir)

Rather slow but steady grower. This variety does fairly well even in the South.

	10	100
8-10 inch (S), 3-4 years	\$1.50	\$
10-15 inch (S) (T), 3-4 years	2.00	

CEDRUS DEODARA

4-6 inch (S)	.50	4.00
6-8 inch (S)	.75	6.00
8-12 inch (S) (T), 2 year	1.50	12.00
12-18 inch (S) (T), 2 year	2.00	15.00

CHAMAECYPARIS LAWSONIANA ALUMI

(Blue Lawson Cypress)

A most beautiful Lawson Cypress with deep blue colored compact foliage. Thrive in the South as well as up North.

4-6 inch (C) (T)	.75	6.00
6-8 inch (C) (T)	1.00	8.00
8-12 inch (C) (T)	1.25	10.00
12-18 inch (C) (TT)	2.00	15.00

CHAMAECYPARIS LAWSONIANA ARGENTEA

(Silver Lawson Cypress)

Similar to Alumi, but leaves are rather whitish, and finer texture.

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.25	10.00
8-12 inch (C) (TT)	2.00	

CHAMAECYPARIS LAWSONIA AUREA

(Golden Lawson Cypress)

A very beautiful golden cypress of the same character as silver cypress. Pyramidal and compact, young growth being clear shiny golden yellow.

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.25	10.00
8-12 inch (C) (TT)	2.00	

CRYPTOMERIA JAPONICA VAR YOSHINO

Much finer leaves and more compact growth than common Cryptomeria Japonica. It grows in symmetrical pyramidal shape and thrives far better.

		10	100
6-8 inch (C) (T)		1.25	10.00
8-12 inch (C) (T)		2.00	15.00

CUNNINGHAMIA LANCEOLATA (Chinese Fir)

It closely resembles Araucaria but the foliages are narrower, brighter green and less rigid. It has very much more resisting power against cold than Araucaria; it stands the zero weather! Stately and graceful appearance will be given in both individual and group plantings. This is only variety in fir-like conifer, thrives well in the South. Very vigorous grower.

4-6 inch (C) (T)		1.00	6.00
6-8 inch, (C) (T)		1.25	8.00

CUPRESSUS SEMPERVIREN PYRAMIDALIS

(Royal Italian Cypress)

We offer here only those propagated by cuttings from typical narrow, compact, columnar trees.

6-8 inch (C) (T)		1.00	7.00
8-10 inch (C) (TT)		1.25	10.00

CUPRESSUS TORULOSA MAJESTICA

(Bhutan Cypress)

A fast growing pyramidal conifer from Himalayas. It grows in a dense, broad pyramidal shape with light green foliages.

4-6 inch (C) (T)		1.00	8.00
------------------	--	------	------

JUNIPERUS CHINENSIS ALBO-VARIEGATA

Dwarf and very compact growth, with numerous creamy white tips and branchlets scattered over the plant. Rather slow grower but exceedingly attractive appearance.

6-8 inch (G) (TT), 2 years		2.00	17.50
8-10 inch (G) (TT), in field		3.00	25.00

JUNIPERUS CHINENSIS COLUMNALIS

This particular variety was introduced from China. It reaches approximately 20 feet in height. Very narrow columnar shape with very compact growth. There are two kinds in existence, one green and the other blue. Ours is the one with blue foliage, and grafted.

8-12 inch (G) (TT), 2 year		4.50	40.00
12-18 inch (G) (TTT), field grown		6.00	

JUNIPERUS CHINENSIS FEMINA

(J. Japonica Sylvestris)

Loosely pyramidal with uniquely spreading branches. Foliage somewhat feathery. Very hardy; thrives well in South as well as in North.

2-4 inch (C) (T)		1.00	7.50
4-6 inch (C) (T)		1.25	9.00
6-8 inch (C) (T)		1.50	12.00
8-12 inch (G) (TT), field grown		3.00	25.00

JUNIPERUS CHINENSIS PFITZERIANA

(Pfitzer Juniper)

One of the best low growing junipers. Very popular all over the country.

4-6 inch (C) (T)		1.00	6.00
6-8 inch (C) (T)		1.25	8.00

JUNIPERUS CHINENSIS PROCUMBENS

(Trailing Juniper)

Best known of the prostrate creeping juniper. Dense mat of blue-green foliage. Extremely hardy.

	10	100
4-6 inch (C) (T), 2 year	1.00	7.50
6-8 inch (C) (T), 2 year	1.25	10.00
8-12 inch (C) (TT), field grown	2.00	15.00

JUNIPERUS CHINENSIS SARGENTI

One of the best newly introduced ornamentals from the Orient by Prof. Sargent. Foliages and twigs are much finer than those of Procumbens. We offer here blue strain.

2-4 inch (C) (T)	1.25	10.00
4-6 inch (G) (TT)	2.00	15.00

JUNIPERUS COMMUNIS (English Juniper)

Being propagated by cuttings from best shaped trees of choicest specimens, ours are in uniform of medium broad symmetrical pyramidal shape.

6-8 inch (C) (T)	.75	6.00
8-10 inch (C) (T)	1.00	7.50
10-12 inch (C) (TT)	1.25	9.00
12-18 inch (C) (TT), field grown	1.50	12.00

JUNIPERUS COMMUNIS ASHFORDI

Similar to the last, but columnar in habit. Compact and narrow growth.

6-8 inch (C) (T)	.75	6.00
8-10 inch (C) (T)	1.00	7.50
10-12 inch (C) (TT)	1.25	9.00
12-18 inch (C) (TT), field grown	1.50	12.00

JUNIPERUS COMMUNIS COLUMNNALIS

(Columnar English Juniper)

Our strain is strictly columnar, just like Royal Italian Cypress. Plant in height of 6-7 feet has only 8-10 inches of diameter in its width, without having any shearing. Very compact growth with silvery green foliage. Very hardy and thrives well even in the section where Irish juniper generally fails to grow. We recommend this variety most highly.

4-6 inch (C) (T)	.90	7.00
6-8 inch (C) (T)	1.10	9.00
8-10 inch (C) (T)	1.25	11.00

JUNIPERUS COMMUNIS DEPRESSA

(Canadian Juniper)

A low spreading Juniper. Very hardy and rapid grower. Ours being propagated by cuttings from best shaped specimens they are far superior to those of seedling.

6-8 inch (C) (T)	.75	6.00
8-10 inch (C) (T)	1.00	7.50
10-12 inch (C) (T)	1.25	9.00
12-18 inch (C) (TT), field grown	1.50	12.00

JUNIPERUS COMMUNIS DEPRESSA AUREA

(Golden Canadian Juniper)

A most beautiful prostrate juniper. The shape and habit are similar to that of green Canadian Juniper, but its brilliant golden color, especially when new growth come forth, gives most distinct appearance of beauty.

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.25	10.00
8-12 inch (C) (TT)	1.50	12.00
12-15 inch (C) (TT), field grown	2.50	20.00

JUNIPERUS CONFERTA (Shore Juniper)

A low prostrate juniper with slender, spreading branches. Foliage, willow-green in color. It thrives well on seashore, particularly in sandy soil. However, it grows nicely also in interior.

		10	100
4-6 inch (C) (T)	1.00	7.00
8-10 inch (C) (TT), 3 years old	1.25	10.00
10-12 inch (C) (TT), 3 years old	1.50	12.00
12-18 inch (C) (TT), 3 years old	2.00	15.00

JUNIPERUS EXCELSA STRICTA

(Spiny Greek Juniper)

Well known dwarf variety in conical shape. Grows rather slow but very hardy.

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.25	10.00
8-10 inch (C) (TT), field grown	2.00	15.00

JUNIPERUS JAPONICA OBLONGA

Semi-upright, with short light green leaves. One of very interesting junipers.

8-10 inch (G) (TT)	4.00	35.00
10-12 inch (G) (TT)	5.00	40.00

JUNIPERUS VIRGINIA GLAUCA (Silver Juniper)

Known as Silver Juniper. Ours was grafted last spring and grown one year under lath. Can lining out in the field with perfect safety.

8-10 inch (G) (TT), 2 year old	4.00	35.00
10-12 inch (G) (TT), 2 year old	5.00	40.00
12-15 inch (G) (TT), 3 year old	6.00	50.00

JUNIPERUS ELEGANTISSIMA LEE

(Golden Tip Juniper)

A most beautiful juniper. Especially so when new growth, which is rich creamy golden color, appears with old green foliage in contrast.

8-12 inch (G) (TT), 2 year	5.00
----------------------------	-------	------

JUNIPERUS VIRGINIA CANNATI

Shape and habit are the same as Glauca but foliages are bright green. It grows well down south as well as up north.

8-10 inch (G) (TT), 2 year old	4.00	35.00
10-12 inch (G) (TT), 2 year old	5.00	40.00
12-15 inch (G) (TT), 3 year old	6.00	50.00
15-18 inch (G) (TTT), field grown	7.00	

JUNIPERUS VIRGINIA SCHOTTI

(Schott Red Cedar)

It resembles to Cannati but more dwarf and compact; foliages yellowish green and attractive.

8-10 inch (G) (TT), 2 years	4.00
10-12 inch (G) (TT), 2 years	5.00

JUNIPERUS VIRGINIA KOSTERI

Semi-dwarf. Closely resembles in appearance to Pfitzer Juniper, but grows slightly taller than the other. Spreads naturally with dense foliage of light blue. It also thrives well down south as well as north.

3-5 inch (C) (T)	1.00	8.00
8-12 inch (C) (TT), field grown	2.50	20.00

PODOCARPUS SINENSIS MACROPHYLLA (Large Leaved Japan Yew)

Dark green leaves with upright stem. Thrive well in sunny spot as well as in shady place. Growth of this variety is not so slow as the other yews, particularly our strain is in nature of upright growth and very rapid grower with large leaves.

	10	100
4-6 inch (C) (T)75	5.00
6-8 inch (C) (T), 2 years	1.00	8.00
8-12 inch (C) (T), 2 years	1.50	12.00

PODOCARPUS ELONGATUS (Fern Podocarpus)

Recent introduction and very rare variety. Most beautiful tree of medium size with very narrow light green foliage. Rather tender and not recommendable for outside planting in the sections where temperature goes down below 25 degrees F. However, very much desirable as pot plant.

8-12 inch, in 3-inch pots 1.50 10.00

PODOCARPUS NAGI

Another rare variety of Podocarpus family. Leaves are broad as if broad-leaved evergreen, very thick, leathery and glaucous in color. Appearance and growth resemble very much to Black Acacia. Not very hardy.

6-8 inch, from 3-inch pots 1.25 10.00
8-12 inch, from 3-inch pots 1.50 12.00

FIG. 1—Showing some of our coniferous lining out stock. From left to right, *Thuja Orientalis Bakerii* 8-10 inch; *Retinospora Plumesa* 6-8 inch; *Chamaecyparis Lawsonia Alumi* 8-10 inch, and *Juniperus Communis Ashfordi* 6-8 inch.

RETINOSPORA FILIFERA (Thread Leaved Retinospora)

A graceful compact evergreen with drooping thread-like leaves and branches. Very hardy and decorative.

	10	100
6-8 inch (C) (T), 2 year old	1.00	8.00
8-10 inch (C) (T), 2 year old	1.25	10.00
10-12 inch (C) (T), 2 year old	1.50	12.00
12-18 inch (C) (TT), field grown	1.75	15.00

RETINOSPORA FILIFERA AUREA (Golden Thread Leaved Retinospora)

A graceful compact evergreen conifer with pendulous thread like branches. Its golden color is exceptionally attractive.

4-6 inch (C) (T)	1.00	7.00
6-8 inch (C) (T)	1.25	9.00
8-10 inch (C) (T)	1.50	12.00
10-12 inch (C) (TT)	1.75	
12-15 inch (C) (TT), field grown	2.50	

RETINOSPORA LEPTOCLADA

Entirely different from Retinospora Seiboldi, which is called by Western nurserymen R. Leptoclada. Dwarf and rather slow grower, short branches and very compact appearance. Leaves very small but not like scale, rather resemble to R. Obtusa Nana. Grayish green in spring and summer and turns purple in winter. Very desirable variety.

4-6 inch (C) (T)	1.00	7.00
6-8 inch (C) (T)	1.25	10.00
8-10 inch (C) (TT)	1.50	12.00

RETINOSPORA OBTUSA CRIPPSII AUREA

Semi-dwarf. One of the most unique golden conifers with graceful fern-like foliages. The outer tips of all branchlets shading into golden yellow.

4-6 inch (C) (T)	1.00	7.00
6-8 inch (C) (T), 2 year	1.25	9.00
8-12 inch (C) (TT), 3 year	2.00	
12-18 inch (C) (TT), field grown	3.00	

RETINOSPORA OBTUSA GRACILIS

(Graceful Hinoki Cypress)

Tall growing Hinoki Cypress with larger and coarser branchlets, leaves of which hold shiny, waxy green all year round. Most desirable for foundation planting, individual setting as well.

8-10 inch (C) (T)	1.25	10.00
10-12 inch (C) (T)	1.50	12.00
12-18 inch (C) (TT)	1.75	15.00

RETINOSPORA OBTUSA NANA COMPACTUM

Dwarf Japanese Cypress. Very dense foliage with bright green color. Very compact grower. One of the best dwarf varieties.

2-4 inch (C) (T)	1.50	12.00
------------------	------	-------

RETINOSPORA PISIFERA AUREA

(Golden Sawara Cypress)

Strong growing, rather open habit, pyramidal form, graceful golden foliage.

6-8 inch (C) (T)	.75	6.00
8-10 inch (C) (T), 2 year old	1.00	8.00
10-12 inch (C) (T), 2 year old	1.25	10.00
12-18 inch (C) (TT), field grown	1.75	15.00

RETINOSPORA PLUMOSA (Green Plume Cypress)

Rapid grower, with foliage arranged in billowy plumes of a rich green. Its irregular outline is pleasing in soft artistic taste in landscape. Thrives very well in the Gulf States as well as in Atlantic coast.

	10	100
6-8 inch (C) (T), 2 year old75	5.00
8-12 inch (C) (T), 2 year old	1.00	7.00
12-18 inch (C) (TT), 2 year old	1.25	10.00
18-24 inch (C) (TT), field grown	1.50	12.50

RETINOSPORA PLUMOSA AUREA (Golden Plume Cypress)

Similar to the above but its new growth is decidedly golden and very attractive. It grows somewhat slower than green Plumosa.

6-8 inch (C) (T), 2 year75	6.00
8-10 inch (C) (T), 2 year	1.00	8.00
10-15 inch (C) (TT), 3 year, field grown	1.50	12.00
15-18 inch (C) (TT), 3 year, field grown	2.00	17.50

RETINOSPORA PLUMOSA ARGENTEA (Silver Tip Dwarf Plume Cypress)

Silver tipped retinospora of extremely compact and very dwarf growth. Its being in shape of perfectly globular, most suitable for urn, beside formal planting in garden.

4-6 inch (C) (T)75	6.00
6-8 inch (C) (T)	1.00	8.00
8-10 inch (C) (T)	1.25	10.00
10-15 inch (C) (TT), field grown	1.75	15.00

RETINOSPORA PLUMOSA GLAUCA

Changed back from R. Squarrosa Veitchii but holds typical type and character of R. Plumosa. Color: Silvery blue-green, very beautiful.

4-6 inch (C) (T)	1.25	
6-8 inch (C) (T)	1.50	

RETINOSPORA PLUMOSA SULPHUREA

It resembles to R. Plumosa Aurea, but leaves are finer and color of new growth more whitish yellow.

6-8 inch (C) (T)75	6.00
8-10 inch (C) (T)	1.00	8.00
10-15 inch (C) (TT), field grown	1.50	12.00

RETINOSPORA SQUARROSA SIEBOLDI (Andely Cypress)

A broad pyramidal with fine juniper-like blue-green foliage.

4-6 inch (C) (T)75	6.00
6-8 inch (C) (T)	1.00	8.00
8-12 inch (C) (T)	1.25	10.00
12-15 inch (C) (TT), field grown	1.75	15.00

RETINOSPORA SQUARROSA VEITCHII

Pyramidal but irregular outline together with fine soft foliage of silvery blue green arranged in billowy masses like clouds of smoke gives highly artistic effects to your garden.

4-6 inch (C) (T)75	5.00
6-8 inch (C) (T)	1.00	7.00
8-12 inch (C) (T)	1.25	10.00
12-18 inch (C) (TT), field grown	1.75	15.00

THUJA ORIENTALIS (Chinese Arbor Vitae)

4-6 inch (S)	10	1.00
6-8 inch (S)		1.50
8-12 inch (S)		2.00

THUJA ORIENTALIS AUREA CONSPICUA (Goldspire Arbor Vitae)

The best golden pyramidal type yet introduced. Tall and erect with intense golden foliage. Very hardy.

8-10 inch (G) (TT)	2.50	20.00
10-12 inch (G) (TT)	3.00	25.00
12-18 inch (G) (TTT), field grown	4.00	35.00

THUJA ORIENTALIS AUREA NANA (Berckman's Golden Arbor Vitae)

We propagate only by cutting or grafting with scions from true Berckman's Golden and absolutely true to type.

4-6 inch (C) (T)	1.00	7.00
6-8 inch (C) (T)	1.25	9.00
8-10 inch (C) (TT), 2 years	1.50	11.00
10-12 inch (C) (TT), 2 years	1.75	14.00
12-15 inch (C) (TTT), 3 years, field grown	2.00	16.00

THUJA ORIENTALIS BAKERII

Prettiest of all pyramidal arbor vitae. Pleasing bright green color, retaining whole summer and winter.

4-6 inch (C) (T)75	6.00
6-8 inch (C) (T)	1.00	8.00
8-10 inch (C) (T), 2 year	1.25	10.00
10-12 inch (C) (T), 2 year	1.50	12.00
12-15 inch (C) (TT), 3 year, field grown	1.75	15.00

THUJA ORIENTALIS BONITA

Compact, dwarf cone-shaped, with foliages of rich green color which remains unchanged through the year.

6-8 inch (C) (T)	1.00	9.00
8-10 inch (C) (T)	1.25	11.00
10-15 inch (C) (TT), field grown	1.75	15.00

THUJA ORIENTALS GLAUCA

(Blue Green Arbor Vitae)

Commonly called blue-green arbor vitae. Closely resembles to Rosedale Hybrid, but color of the foliage is slightly deeper blue. Grows satisfactory in the South.

4-6 inch (C) (T)75	6.00
6-8 inch (C) (T)	1.00	8.00
8-10 inch (C) (T)	1.25	10.00

THUJA ORIENTALIS RAMSEY'S HYBRID

Fast growing arbor vitae with stout, erect branchlets. Thread-like leaves in dark green color. Stands well against drouth and heat as well as cold. The larger it gets the more handsome it becomes.

8-12 inch (C) (T)	1.25	10.00
12-15 inch (C) (TT)	1.75	15.00

THUJA ORIENTALIS TEXANA GLAUCA

Strong and rapid grower. Tall and slender with blue foliage.

4-6 inch (C) (T)75	6.00
6-8 inch (C) (T)	1.00	8.00
8-10 inch (C) (T)	1.25	10.00

AZELEAS

City of Mobile has been known last several years to the world as "Azalea City". Besides those already planted many years ago annual plantings in public places and private residences are totaled many times of a thousand. We dare to say there is no floral display equal to that of Mobile in spring when Azaleas in full bloom. No wonder so many visitors pour in this Gulf City from every direction, March to May, simply to see these beautiful views. Azaleas, in contrary to general belief or rather guess, are by no means hard to grow, providing a certain requirement fulfilled. We are in strong belief that Azalea Indica can be raised without any trouble in all Gulf Coast regions and the Atlantic Coast as far north as North Carolina and hardy Japanese Azaleas still further to the state of New Jersey. We earnestly recommend this flowering bush to fellow nurserymen as well as florists in said territories to try more or less like we did years ago. A few cultural suggestions as the following:

1. Azaleas thrive in soil of acidity. Use plenty of leaf mold (oak leaves most desirable), pond muck or peat moss.
2. Lime or alkaline soil is poisonous. In case Azalea to be planted in such a soil remove original soil and use plenty of leaf mold or peat moss mixed with the other soil, no alkali contained or apply Aluminum Sulphate at the rate of 4-inch pot full to a wheelbarrowful of soil.
3. As Azalea root system is very shallow it dries fast. Give enough water to keep roots moist always.
4. Azalea delights in a moist soil but it will not tolerate a water saturated soil condition; so Azalea beds should be selected where all surplus water will run off quickly.
5. Azalea thrive best at partly shady place (when the bush grows large it stands in full sunlight) but many good blossoms cannot be expected if planted under entire shade.
6. Azalea is not very gross feeder. If plenty of leaf mold or such rotten organic matter applied on it does not require any commercial fertilizer. On contrary very often heavy application of fertilizer injures the root system. However, if necessary light application of well rotten cow manure, sheep manure or cotton seed meal is beneficial.
7. Red spider and Thrip some times trouble the growers. Frequent syringing of the plant with plain water will usually keep it down. If this does not control spray or dust the plant with sulphur mixture.

AZALEA INDICA

SINGLE FLOWERING, DESCRIBED IN VARIETIES PINK AND ROSE RED

* **BRILLIANT**—This is a splendid variety of watermelon red. color of flower is slightly darker than the "Pride of Mobile". It blooms early to late profusely. Leaves small.

GEORGES FRANC Profuse early bloomer. Flower large flame pink with deep carmine spot near throat. Exceptionally fine, very rare.

HARRY VEITCHII—A beautiful pink flower. Petal is not pointed out so much as the other varieties. Leaves medium, roundish. One of the best pink azaleas but rather slow grower.

MAXWELL—Very hardy. Flower large, carmine red. Leaves rather roundish, soft texture and light green when young.

* **PERFECTION**—Large rose pink flower, blooming very freely at early in the season. It grows to medium size, very vigorous.

PRAESTANTISSIMA—Closely resembles to Pride of Dorking, but blooms a week to ten days earlier.

PRIDE OF MOBILE (Big Leaved Watermelon Pink)—It was known simply as "Big Leaved Watermelon Pink" until a few years ago. However, it has now right name, "Pride of Mobile," as this variety not found elsewhere but Mobile and vicinity. It is vigorous grower, well balanced in shape, tall and spreading also. A splendid specimen of this variety could be seen in Spring Hill, Ala., suburb of Mobile, single plant of 12 feet in height covering 100 square feet. In spring, at height of the season, the plant covered, giving no open space, with bright watermelon pink flowers in mass, forming solid ball of pink in enormous size. It stands also against much severer temperature than most of the other Indica varieties can. This is one of the best single flowering azaleas without question.

PRIDE OF DORKING—Flower large, ceries or bright red, late bloomer. Leaves medium, dark green. Vigorous grower. One of the best varieties.

SHELL PINK—Unable to find original name, but known to us as "Shell Pink" commonly called. Flower light pink, blooms very early. It begins to bloom right after Christmas when there is no flower of any kind in garden. Upright growth and not compact.

(ORANGE-RED

* **DAPHNE RED**—True name of the variety not being fully confirmed, listed here temporarily by the name locally known. Fairly good sized flowers of orange red with lavender pirk spots on throat. Distinct character of this variety is shown, when the plant young, by slender branches which is semi-creeping nature.

GLORY OF SUNNINGHILL—Large orange-scarlet flower; blooms rather late in the season. Very compact grower with shiny green foliages; one of the most desirable varieties.

***MOSS POINT RED**—This is another one that real name of the variety has not been fully confirmed. Very vigorous grower with glossy foliages. Flower, orange red with purple spots at the throat. It blooms middle to late of the season.

* **PRESIDENT CLAY**—Medium height in upright. Flower, medium size, orange red with purple marks at the throat.

PRINCE OF ORANGE—Flower large, dark orange red. One of the richest colors of all azaleas. Late bloomer. Leaves medium, dark shiny green. Rather low headed with compact growth.

STRAWBERRY RED—Early bloomer; bright red flower; rather broad foliage of light green on weeping slender branches.

SALMON

* **DAPHNE SALMON**—Light salmon flower of medium size, blooming early in the season. It grows to medium size. A very desirable variety.

DUC DE ROHAN—Flower single, medium size, very pretty salmon pink. Leaves shiny and small. Low headed compact growth.

* **DUKE OF WELLINGTON** Flower, soft salmon with dark center, blooming in mid-season.

MOSS POINT LATE SALMON—Latest bloomer of all Indica varieties. Flower, very large, round and waved petals of bright salmon color. Very vigorous, compact grower with thick and dark shiny green leaves.

WILLIAM BULL—Double flower in mud red color. It is very double and resembles to double flowering pomegranate. Exceedingly vigorous and upright grower.

LAVENDER-LILAC

FORMOSA—A most popular variety. Flowers single and large, lavender. Leaves medium to large. Very thrifty, easiest of all to grow.

INDICA ROSEA PURPLIANA—A sport of Indica Rosea. Flower, solid color of light purple with dark spot at the throat. Character and growth same as Indica Rosea.

OMURASAKI—Very large single flower, light lavender. Leaves also very large. Vigorous grower.

ORCHID LAVENDER—As name of the variety has not yet been identified it is listed here by its color that is very rare. It blooms very early—as early as Shell Pink. Flower, Medium size in beautiful light lavender pink. Leaves, rather narrow. Vigorous medium size grower.

PHOENICIA—It resembles very much to Formosa, with abundant lavender flowers. Leaves and petals of flower are narrower than that of Formosa. Very vigorous hardy grower; rather low and compact.

* **ROSY PURPUREA**—Very strong grower and hardy. Dark rosy purple flower. One of the most desirable varieties.

VITATA FORTUNEI PURPLEANA—Character and habit same as Vitata Fortunei; only difference is that this variety is solid lavender. It has longer blooming period than all other azaleas, starting to bloom first of all and continues to complete glory with later flowering varieties.

WHITE

* **FIELDERS WHITE**—Large pure white flower opening early in the season; vigorous grower.

* **FLAG OF TRUCE**—A fine early blooming double white with waved petals. Foliage, dark green, slightly curled.

INDICA ALBA (Ledifolia Alba)—Very hardy snow white flower, blooming slightly later than Fielders' White.

* **LATERETIA ALBA**—A late flowering variety with pure white flower of medium size. Dense and compact grower with small shiny green leaves.

VARIEGATED

CRITERION—Rather low compact grower. Flower richly striped with pink on white ground. Leaves narrow, shiny green. One of the best variegated varieties of single flowering azalea. Late bloomer.

INDICA ROSEA MAGNIFICA—Distinct type from the other Indica varieties. Hardy, rapid and upright grower. Foliage very large and thick; sticky secretion from its leaves. Flower single, very large, perhaps largest of all azaleas, white with rose throat, being resembled to some of orchid flowers.

IVERYANA—Flower medium to large. Almost white, leaving only faint pink in stripe. Late bloomer, very hardy.

* **CAVENDISH (Lady Edith)**—It resembles very much to Criterion—two varieties often mixed by many growers; but the flower is smaller and differently variegated pink on white ground compared with Criterion. Compact grower and hardy.

* **LOUIS MARGOTTIN**—Large white flower striped with very narrow pink, resembling Iveryana. Growth medium to large. Late bloomer.

VITATA FORTUNEI—Flower single, well striped with purplish pink on white ground. Leaves medium, roundish. Vigorous upright growth, not compact. Blooms very early, as early as Shell Pink. Once in a while solid lavender flower appears among this variety. We separate it with utmost care.

PRICES OF INDICA VARIETIES

	10	100
4-6 inch (C) (T), lathhouse grown	\$1.00	\$ 8.00
4-6 inch (C) (T), 2½-inch pots	1.25	10.00
6-8 inch (C) (TT), lathhouse grown, B&B	3.00	25.00
8-10 inch (C) (TT), lathhouse grown, B&B	4.00	35.00

(Mark * indicates available only small size, 4-6 inch lathhouse grown and 4-6 inch from 2½-inch pots. Azaleas marked * sold only with orders of other varieties.)

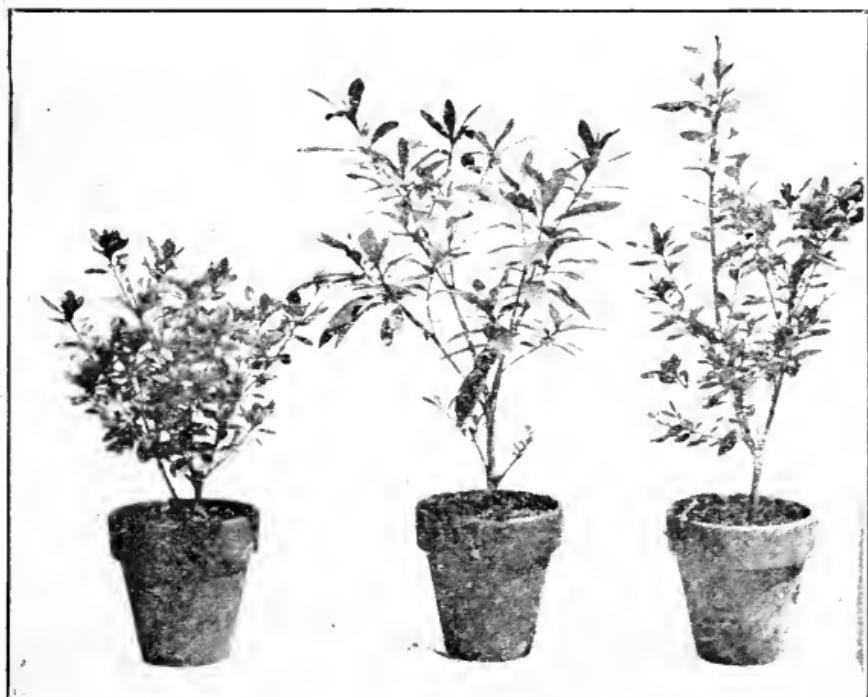

HARDY JAPANESE AZELEAS

The following varieties are generally known as Hardy Japanese or Kurume Azaleas. Size of flowers and leaves are generally smaller and slow grower compared with Indica varieties. However, they have more number of blooms usually and far more resisting power against freeze, while they stand merciless hot summer sun in the South, as our experiment shows, being planted in open ground where not a slightest shade to protect them and thrive equally well, if not better, as Indica varieties.

BENIGIRI—Compact upright grower. Leaves small, dull green. Flower small but abundant, deep bright red.

* **BRIDE MAID**—Bright salmon flower in large trusses. Foliage small, very vigorous grower.

FIG. 2

Azalea
Flame
8-10 inch)

CHRISTMAS CHEER—A real pleasing Christmas red. Small dark glossy green leaves. Hose-in-hose type.

FLAME—Brilliant mud red, very early bloomer. Upright and vigorous grower.

HEXE (Firefly)—A Kurume hybrid of low dense compact in habit. Flower, large in size for this group, crimson red, semi-double.

HINODEGIRI—Most popular hardy Japanese azalea. Dwarf compact grower. Leaves glossy green, roundish. Abundant flowers of bright scarlet color. Ideal for pot plant.

HINAMOYO—Flower beautiful soft pink. Leaves are very small.

* **KIMNAZOI**—Single orange red flower with extremely narrow petals. It blooms very late (at June). Leaves very narrow. Low compact dense grower.

MACRANTHA, Single Flowering—Large single clear pink flower. Leaves are small, oblong, dark shiny green. Rather dwarf and very compact grower. Even while no flowers on, beautiful evergreen leaves alone most admirable. Very late bloomer.

MACRANTHA, Double Flowering—Large double pink flowers, blooming very late, June, and a few blossoms keep on all summer. Upright grower.

MACROSTEMON—Large single salmon pink flowers at May.

* **ORANGE BEAUTY**—Orange pink, good sized flowers in immense clusters.

* **PEACH BLOW** Single, pale shade of peach blossom pink; very fine.

PINK PEARL—Most noble cherry rose color shading light to center, large full trusses, hose-in-hose type.

SNOW—Large pure white flowers profusely in cluster. Foliage rather large glossy green.

* **SUNSTAR**—Flower single dark rose pink with carmine stripes, not large in size but very dainty and free bloomer.

YAYEGIRI—Leaves rather thin but very shiny green. Flowers salmon red, hose-in-hose type.

* **YELLOW NATIVE AZALEA (Azalea Austrina)**—Color of this flower varies from creamy yellow to orange yellow. It opens in April before expansion of the leaves. A strong grower. Most picturesque effects can be seen as planted among evergreen shrubs or with other species of azaleas.

PRICES OF HARDY JAPANESE AZALEAS (Except Hinodegiri) AND YELLOW NATIVE AZALEA

12-18 inch (C) (TT), field grown	1.75	15.00

CAMELLIA JAPONICA (Double Flower, Assorted Colors, Strictly Separated)

One of the most popular plants in the Gulf Coast region, with glossy green foliage and attractive flowers at winter when no other blossoms found in garden. Very dense and symmetrical in its growth. Propagated only by cuttings taken from the specimens in merit. We have number of named varieties in our stock this season ready for sale. Sorry to say, however, some of them have their names of varieties somewhat confused as many nurseries listed same varieties under different names. If we try to sell them by names before fully identified and confirmed it may mislead our customers and more confusion might be result. We are, therefore, going to keep this stock another year for further study. We offer you this season only potted plants that stand much better for transplanting. They are by colors strictly separated and not by names.

3-5 inch, from 2¼-inch pots (spring delivery only)	1.50	12.00
6-8 inch, from 2½-inch pots	2.50	20.00
8-12 inch, from 3-inch pots	3.50	30.00
12-18 inch, from 4-inch pots	6.00	50.00

CAMELLIA SASANQUA

Smaller leaved in camellia family. It gives more shrubby effects and softer taste to landscape gardening. Vigorous grower and free from scale. Blooms in October and November. We offer this season double white (*Mineno-Yuki*), semi-double white, single white and single pink.

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.25	10.00
8-12 inch (C) (T)	1.50	12.00
12-18 inch (C) (TT)	2.50	20.00

CAMELLIA THEA (Tea Plant)

Sweet scented flower in late fall. A fine evergreen shrub

8-12 inch (C) (T)	1.50	

ELAEAGNUS PUNGENS VARIEGATA (Yellow Edge Elaeagnus)

ELAEAGNUS PUNGENS MACULATA (Yellow Center Elaeagnus)

Both of them variegated, but one has yellow center with dark green margin, the other yellow edge and green center that will not be changed by sun nor cold. Most beautiful evergreen shrub among other dark green shrubs.

6-8 inch (C) (T)	1.25	10.00
8-12 inch (C) (T)	1.50	12.00
12-18 inch (G) (TT), field grown	2.50	20.00
18-24 inch (G) (TT), field grown	3.00	25.00

ELAEAGNUS PUNGENS FRUITLANDI

Leaves very large and glossy green with silvery beneath; bore abundant edible fruit even in its young age.

4-6 inch (C) (T)	1.00	7.00
6-8 inch (C) (T)	1.25	9.00
8-12 inch (C) (T)	1.50	12.00
12-18 inch (C) (T)	2.00	15.00

ELAEAGNUS PUNGENS

Shiny green leaves with silvery beneath.

ELAEAGNUS PUNGENS REFLEXA

Branches in drooping and spreading character. Leaves scaly beneath with bronze color. Very useful landscape decoration.

ELAEAGNUS PUNGENS SIMONI

Leaves large and more roundish; hardy and good grower.

ELAEAGNUS PUNGENS JENNY

With shiny large leaves; very desirable variety.

ELAEAGNUS PUNGENS DWARF THORN

Leaves smaller and narrower and more spiny than any above variety. Dwarf and compact and very bushy.

8-12 inch (C) (T)	1.50	12.00
12-18 inch (C) (T)	2.00	15.00

ERICA CARNEA (Spring Heath)

A beautiful Heath with rosy pink flower; hardy thriving variety.

3-5 inch (C) (T)	1.00	8.00
5-7 inch (C) (T)	1.25	10.00

EUONYMUS CARRIERI

Similar to Euonymus Radicans but not creeper. Leaves shiny green, but some times turn to bronze color after severe frost. It grows well in sun as well as in shade; very hardy.

6-8 inch (C) (T)	.50	3.00
8-12 inch (C) (T)	.75	5.00
12-18 inch (C) (T)	1.00	8.00

EUONYMUS PATENS (E. Sieboldi)

Broad and more spreading habit in growth. Said semi-evergreen in the north, but leaves stay green entire winter in the southern states. Brilliant scarlet berries in fall are most attractive. Absolutely hardy.

		10 100
4-6 inch (C) (T) -----	.50	4.00
12-18 inch (C) (T) -----	1.25	10.00

EUONYMUS JAPONICA COLUMNALIS

Green Japanese evergreen Euonymus, growing slender and compact.

4-6 inch (C) (T) -----	.50	3.50
6-8 inch (C) (T) -----	.75	6.00

EUONYMUS JAPONICA ALBO MARGINATA

Leaves variegated with silvery white; a beautiful shrub.

4-6 inch (C) (T) -----	.50	4.00
------------------------	-----	------

EUONYMUS JAPONICA MICROPHYLLA

(E. Pulchellus)

A well known dwarf bush with small leaves. Growing only less than a foot. Best suitable to low border as well as miniature garden.

2-4 inch (C) (T) -----	.50	4.00
4-6 inch (C) (T) -----	.75	6.00

EUONYMUS RADICANS and E. R. VARIEGATA

Description and prices will be found under heading "VINES."

FATISIA JAPONICA (Fig. 4)

Much resembles to Aralia Spinosa, but this is evergreen and stand much colder temperature without losing leaves. Foliage large and glossy shiny green with shape of five fingers spread. There is not many trees or shrubs in existence grow in entirely shady place, but this Fatisia thrives better in such location where most of the others cannot grow. Newly introduced, very attractive plant.

6-8 inch (S) (T) -----	1.25	10.00
8-10 inch (S) (T) -----	1.50	12.00
10-12 inch (S) (TT) -----	1.75	15.00
12-15 inch (S) (TT) -----	2.50	20.00
12-15 inch, from 4-inch pots -----	3.50	30.00

FEIJOA SELLOWIANA (Pineapple Guava)

Compactly growing shrub. Leaves green with silvery underneath. One of most desirable plants for the Gulf Coast.

6-8 inch (C or S) (T) -----	1.00	7.00
8-10 inch (TT) -----	1.25	9.00

GARDENIA FLORIDA (Cape Jasmine)

Well known evergreen shrub under the name of Cape Jasmine. Leaves large glossy dark green. Flowers large, double, pure white. Very highly scented. Hardy outdoor plant as far north as Nashville.

4-6 inch from cutting bed -----		3.00
6-8 inch (C) (T) -----	.75	5.00
8-12 inch (C) (T) -----	1.00	7.00

FIG. 4

FATISIA JAPONICA

GARDENIA RADICANS (Creeping Cape Jesmine)

It grows not over a foot high but spreads 3 to 4 feet. Rather creeping character. Flower double white, very fragrant. Leaves small and shiny glossy green. A very plant for rock garden. Doubtlessly suitable to florist for Mother's Day trade as well as that of Memorial Day.

		10	100

8-12 inch (C) (TT) -----	1.25	10.00
	2.00	15.00

ILEX CRENATA (Japanese Dwarf Holly)

A much branched evergreen shrub, with oval, crenate leaves.
A splendid specimen and also desirable for hedge planting.
2-4 inch (S) ----- ,50 2.00

ILEX CRENATA ROTANDIFOLIA (Round Leaved Japanese Dwarf Holly)

Similar to I. Crenata but leaves are larger and roundish.
4-6 inch (C) (T) ----- .75 6.00
6-8 inch (C) (T) ----- 1.00 8.00
8-12 inch (C) (T) ----- 1.25 10.00
12-15 inch (C) (TT), field grown ----- 1.50

ILEX CASSINE (Dahoon Holly)

A popular evergreen, being native to northern Florida.
Leaves have no spine and dark, shiny green. Much resembles
to Ilex Integra. Producer of bright red berries in abundance.
Supply very limited.

4-6 inch (C) (T) ----- 1.00 8.00

ILEX INTEGRA

A beautiful evergreen. Leaves oblong with taping point,
shiny dark green. White flowers at May and beautiful red
berries in winter.

3-5 inch (C) (T) ----- 1.25 10.00
5-8 inch (C) (T) ----- 1.50 12.00

ILEX LATIFOLIA (Big Leaved Holly)

Hardy evergreen shrub. Leaves oval to oblong lanceolate,
very thick, serrate, glossy green above, very large—some-
times reaches 7 inches long and 3 inches wide. Small flower
at May and cluster of red berries at winter.

1-2 inch (S) (T) ----- 1.00 7.00

ILEX OPACA FEMINA (Berried Kind)

Well known native evergreen, growing everywhere wild.
However, this wild plant is hard to be transplanted suc-
cessfully. Moreover, it bears no berry in many cases. Our
propagation was done by cuttings secured from best berry-
bearing specimen and guaranteed to bear.

From cutting bed ----- .75 5.00
4-6 inch (C) (T) ----- 1.00 8.00
6-8 inch (C) (T) ----- 1.25 10.00
8-12 inch (C) (T) ----- 1.50 12.00

ILEX ROTANDA

This is the variety considerably different from Ilex Crenata
Rotandifolia. The leaves are much larger but thinner. Very
rapid grower, being introduced by U. S. Government from
China.

4-6 inch (C) (T) ----- 1.00 8.00

ILEX VOMITORIA FEMINA (Berry Bearing Yaupon)

Ours propagated strictly by cuttings from heavily berried specimens.

6-8 inch (C) (T)		1.25	10.00

ILLUCIUM ANISATUM

A handsome hardy broad leaved evergreen shrub or small tree. Smooth entire, light green foliage, anise scented when bruised. Narrow and upright in habit of its growth; very hardy.

4-6 inch (C) (T)		1.00	8.00
------------------	--	------	------

JASMINUM FLORIDUM

Hariest evergreen jasmine, with very dark glossy foliage in graceful arching branches. Very attractive. Yellow flowers in cluster.

6-8 inch (C) (T)		.75	5.00
8-12 inch (C) (T)		1.00	7.00

JASMINUM HUMILE

A tall shrub, reaching 7 to 8 feet in upright growth. Leaves are much larger than that of J. Floridum. Yellow flowers in spring and fall. Hardy as far as Washington, D. C.

6-8 inch (C) (T)		.75	5.00
8-12 inch (C) (T)		1.00	7.00

JASMINUM PRIMULINUM (Primrose Jasmine)

Evergreen shrub with thick green leaves on arching branches. Bright yellow flowers in spring. Very vigorous grower.

6-8 inch (C) (T)		.75	4.00
------------------	--	-----	------

LAUROCERASUS CAROLIANA (Cherry Laurel)

A well known native evergreen. Compact glistening green foliage of medium size. Very attractive as foundation planting, especially in large estate or in park. It also is effective for formal planting when sheared in standard, pyramidal or other shape.

6-8 inch (S)		.50	4.00
8-12 inch (S)		.75	6.00
12-18 inch (S)		1.25	10.00

LAUROCERASUS OFFICINALIS (English Laurel)

Medium to large spreading shrub with broad shiny rich green foliage. One of the most useful plants for southern planting.

3-5 inch (C), from cutting bed		.75	5.00
4-6 inch (C) (T)		1.00	7.00

LAUROCERASUS OFFICINALIS VAR SCHIPKENSIS

Leaves are much smaller and very thick, dark green above and very light green beneath. Very compact grower. This is hardest of all English Laurels, growing successfully in the State of New York.

3-5 inch (C) (T)		1.00	7.00
------------------	--	------	------

CLINOPODIU

(REI)

CLINOPODIUM COCCINEUM (Red Sage)

A slender sparingly branched shrub two to three feet tall with small evergreen leaves and horizontal tubular; bright red flower, blooming all summer and fall until just before Christmas; especially at autumn even young plant of a few inches covered with mass of red flowers. In addition to its attractive appearance, it has pleasant odor which might possibly be utilized in perfumery. This is one of the native plants of Southern Alabama and may probably not be found anywhere else in the country. It grows in poorest sandy or rocky soils unfit for cultivation. After our experimental study of many years we have found that it is easy to transplant and accept any cultivation and pruning. No cold spell ever injured this plant down here; it may stand near zero weather, probably lower. Most suitable to rock garden and border planting in front of tall evergreens; also desirable for decorative house plant.

8-10 inch, special trial order, \$2.00 for 25 plants.

Large quantity upon application.

I COCCINEUM

(AGE)

LIGUSTRUM CILIATUM VARIEGATUM

(Iwaki Privet)

Compact grower, rather small, thick, roundish. Leaves faintly blotched with pale yellow. Although this is not quite so hardy as some of the other Ligustrums, undoubtedly best dwarfed and compact privet in the South.

	10 100
From cutting bed	3.00
6-8 inch (C) (T)	.75 5.00
8-12 inch (C) (T)	1.00 7.00

LIGUSTRUM CORIACEUM (Dwarf Privet)

Dwarf privet in peculiar shape with leathery, thick, dark green leaves greatly curled. Propagated by cuttings from original trees imported from Japan years ago and we have found leaves of our strain are much thicker and more curled. We have this season only limited quantity in small sizes to offer.

2-3 inch (C) (T)	.75	6.00
4-6 inch (C) (T)	1.00	8.00

LIGUSTRUM JAPONICUM AUREAUM

MARGINATUM (Golden Tip Japan Privet)

Much deeper yellow margin on young growth. Bore heavily with purple berries in winter. Contrast with leaves in colors admirable.

LIGUSTRUM JAPONICUM MACROPHYLLUM

A greatly improved strain of Ligustrum Japonicum. Distinguished by exceedingly large thick glossy leaves. The true type and form could only be obtained by grafting.

Prices for the above two varieties:

18-24 inch, grafted, field grown	2.50	20.00
24-30 inch, grafted, field grown	3.00	25.00
30-36 inch, grafted, field grown	3.50	30.00

LIGUSTRUM JAPONICUM EXCELSUM

SUPERBUM

Best of all Japan privets. Leaves variegated with creamy white. Contrast with other green foliages gives exceedingly good effects to view of the garden. Supply limited. Order early.

12-18 inch, grafted, field grown	2.50	20.00
18-24 inch, grafted, field grown	3.00	25.00
24-30 inch, grafted, field grown	3.50	30.00

LIGUSTRUM LUCIDUM COMPACTUM

(True Waxy Privet)

Our strain is in extra dense compact growth with very dark waxy green thick leaves. Very hardy and thrives in most any kind of soil with no particular attention for care. Indeed this is most satisfactory plant for general planting.

LIGUSTRUM LUCIDUM PYRAMIDALIS

(Upright Waxy Privet)

Its growth is decidedly erect and narrow in form. Leaves dark green and glossy but rather pointed at end and not quite so thick as Compactum.

LIGUSTRUM REPANDA (Crinkled-leaf Privet)

Closely resembles to Ligustrum Pyramidalis but leaves narrow and crinkled.

LIGUSTRUM LUCIDUM GRACILIS (Giffing)

A tall slender shrub with strong upright branches. Leaves pointed, thick, shiny and dark green. This variety and Black Leaf are two darkest green leaved species of all Lucidums.

LIGUSTRUM LUCIDUM BLACK LEAF (Griffing)

A medium upright type with glossy dark green heavy foliage. It holds darkest green color under any environment.

LIGUSTRUM LUCIDUM ERECTA (Griffing)

One of pyramidal waxy privets, but this strain shows narrower type than ordinary pyramidalis.

Prices of the above six kinds of Ligustrum Lucidums are as follows:

	10	100
From cutting bed50	2.50
4-6 inch (C) (T)60	4.00
6-8 inch (C) (T)75	5.00
8-12 inch (C) (T)	1.00	7.00
12-18 inch (C) (TT), field grown	2.00	15.00
18-24 inch (C) (TT), field grown	2.50	20.00

LIGUSTRUM IONANDUM

Recent introduction by an agricultural explorer. Leaves very small, like boxwood. On account of its dwarfness, most desirable for low hedge or border planting.

4-6 inch (C) (T)60	4.00
8-12 inch (C) (T)	1.00	8.00

MAGNOLIA FUSCATA (Michelia Fuscata)

Well known Southern shrub with handsome compact evergreen foliage and sweet carmine edged yellow flower which has strong banana-like fragrance. One of the very useful plants for Southern landscape gardening.

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.25	10.00
8-12 inch (C) (T)	1.50	12.00

MAGNOLIA GRANDIFLORA

Very well known Southern Magnolia. Grandest broad-leaver evergreen in the Southern forests.

3-6 inch (S)75	4.00
6-8 inch (S) (T), field grown	1.00	7.00

MAHONIA JAPONICA BEALI

Broad holly-like leaves of very thick texture with spiny edges. Bell shaped yellow flower usually in mid-winter, being followed by cluster of purple berries. This variety thrives well in the south where Mahonia Aquifolium fails to grow, being burnt. Do well under partly shade.

4-6 inch (S) (T)	1.00	8.00
6-8 inch (S) (T)	1.25	10.00
8-10 inch (S) (T)	1.50	12.00
10-12 inch (S) (TT)	2.00	15.00

MALPIGHIA GLABRA (Barbadoe Cherry)

Low headed evergreen shrub with rosy flowers and red berries. Too tender for the northern planting, but most suitable for pot plant.

4-6 inch (C) (T)50	4.00
6-8 inch (C) (T)75	6.00
8-12 inch (C) (T)	1.00	8.00

12-15 inch (S) (TT)	2.00	18.00
15-18 inch (S) (TT)	2.50	22.50

OSMANTHUS AQUIFOLIUM (O. Ilicifolium)

This is hardest of all Osmanthus family. Thrives at New York, possibly as far north as Massachusetts. Leaves leatherly-smooth and shiny. Strong spines on both sides of foliage, somewhat resembles to *Ilex Cornuta* (Chinese Spiny Holly.)

4-6 inch (C) (T)	1.00	7.00
6-8 inch (C) (T)	1.25	10.00
8-12 inch (C) (T)	1.75	15.00
12-15 inch (C) (TT)	2.25	20.00

OSMANTHUS FORTUNEI

Similar to sweet olive, but leaves are thicker and armed with dull spine like American Holly. Less flower, but stands much severer cold spell than the other.
Prices same as *Osmanthus Aquifilium*.

OSMANTHUS FRAGRANCE (Sweet Olive)

Well known shrub with bright glossy thick foliage and small white or yellow flowers sweetly scented. A few plants of this kind fill the air of entire garden with high odor during winter and spring.

		10	100
6-8 inch (C) (T)		1.00	8.00
8-12 inch (C) (T)		1.25	10.00

18-24 inch (C) (TT)		2.00	17.50

PHOTINIA GLABRA

Our introduction of a few years ago and not as yet known to general public (see the picture taken from one of the parent trees). It is a broad-leaved evergreen, very hardy. Whenever covered with new sprouts mass of burning scarlet, tinted here and there with older leaves of green, will surely convince you that this is one of the best trees ever appeared on the market. There are several different strains in existence; some of them are far inferior to ours. Years ago when we imported the trees from Japan careful selection was made. Out of the many trees imported we picked up the best few specimens for parent trees eliminating all others. Ours are surely best and true red leaved Photinia guaranteed. It naturally grows 20 feet high with immense white flowers which are also very attractive. It gives most desirable effects when planted between evergreen conifers. It also gives a splendid view as planted individually in the lawn, trimming in any shape you may desire, such as pyramidal, standard or globe. Exceedingly attractive hedges can be laid also with this plant. Adaptable to almost any soil, yet well drained sandy soil seems more suitable than wet clay. It is not so hard to transplant; yet we recommend strongly our potted plants for your safety's sake.

6-8 inch (C) (T)		.75	6.00
8-12 inch (C) (T)		1.00	8.00
10-15 inch (C) from 2½ inch pots		1.50	12.00
15-24 inch (C) from 3 inch pots		2.50	20.00

PIERIS JAPONICA (Japanese Andromeda)

Thickly shiny leaved evergreen. Grows 5 to 6 feet in height. Drooping cluster of small white flowers early in spring. Best in moistened partially shaded place.

3-5 inch (C), 2½ inch pots		1.00	8.00
5-7 inch (C), very bushy, 3 inch pots		1.50	12.00

PITTOSPORUM TOBIRA

Very dense compact growth with dark green shiny leaves clustered at end of branches. Most valuable plant for southern gardens.

4-6 inch (C) (T)		.65	5.00
6-8 inch (C) (T)		.80	6.00
8-10 inch (C) (T)		1.00	8.00

4-6 inch (C) (T)		.80	6.00
6-8 inch (C) (T)		1.00	8.00
8-12 inch (C) (T)		1.25	10.00

PHOTINIA GLABRA

PYRACANTHA LALANDI (Yellow Berried)**PYRACANTHA FORMOSANA (Orange Red
Berried)****PYRACANTHA S. P. (Tiny Leaves, Bright Scarlet)****PYRACANTHA YUNNANENSIS (Coral)****PYRACANTHA GIBBSII (Scarlet)**

Thorny evergreen with cluster of berries at fall and winter.
Very attractive, more especially among green foliages.

	10	100
8-12 inch (C) (T)	1.00	7.00
12-18 inch (C) (T)	1.25	9.00
18-24 inch (C) (T)	1.75	15.00

QUERCUS ACUTA

One of the most beautiful evergreen oaks ever introduced from Japan. The leaves large, bright glossy green. Very rapid grower.

8-12 inch (S), 2 yr.	1.25	9.00
12-18 inch (S), 2 yr.	1.50	12.00

RAPHIOLEPIS JAPONICA

It grows taller than Ovata. Leaves thick leathery oblong.

RAPHIOLEPIS JAPONICA VAR OVATA

A very desirable low growing evergreen shrub. Leaves oval, thick and leathery. Mass of pinkish small flowers in spring. Persistent through cold weather.

6-8 inch (S), 2 yr.	1.00	6.00
8-10 inch (S), 2 yr.	1.25	10.00
10-15 inch (S), 2 yr.	1.50	12.00

RAPHIOLEPIS INDICA

Propagated by cuttings from the bushes in real type and merit, as the seedlings are naturally in too wide range to contain the true type.

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.25	10.00

RAPHIOLEPIS DELACOURII

A hybrid between R. Indica and R. Salicifolia. Foliage, intermediate, shiny green. Compact growth and rather large panicles of blushed flowers.

4-6 inch (C) (T), Spring delivery only	1.50	12.00
--	------	-------

SERISSA FOETIDA

A low growing evergreen shrub with tiny dark green leaves, yellow margined. Abundant small white flowers. Appearance of the plant somewhat resembles to that of Rock Cotoneaster. Very desirable shrub for border or rock garden. Can not stand too cold.

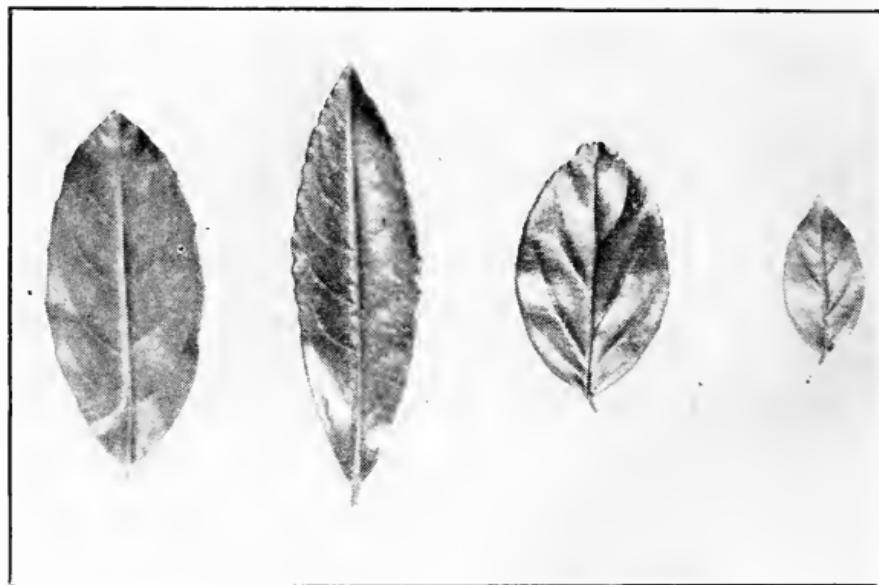

12-18 inch (C) (T)	1.00	8.00
18-24 inch (C) (T)	1.25	10.00

VIBURNUM MACROPHYLUM

(Sweet Viburnum used to be listed under name of Viburnum Odoratissimum). A valuable evergreen shrub with large green, oblong leaves which turn some times to beautiful red in winter. Small white flower being followed by red berries in cluster. Very hardy and grows in any kind of soil and location. Southern planters ought to use more of these Viburnum varieties for their landscape gardening.

4-6 inch (C) (T)	.75	5.00
12-18 inch (C) (TT)	1.00	8.00
18-24 inch (C) (TT)	1.50	12.00

FIG. 8.

Leaves of Different Viburnum.

Left to Right—*V. Macrophyllum* (Southern Sweet Viburnum)

V. Odoratissimum (Japanese Glossy Viburnum)

V. Suspensum (Sandankwa)

V. Tinus

VIBURNUM ODORATISSIMUM

(Glossy Viburnum used to be listed under the name of *Viburnum Odoratissimum Nanum*). Leaves large, oblong with points, polished dark green in color. Its growth is very compact and a little hardier than *V. Macrophyllum*. As it bears berries of coral color it has been known in Japan as coral berried viburnum. This is one of the most promising broad leaved evergreens in the south.

	10	100

LINING OUT DECIDUOUS TREES, SHRUBS, PALMS, VINES AND MISCELLANEOUS

(1000 Rate for Application)

10 100

ALEURITES (Chinese Tungo Oil Tree)

A medium size tree. Large, bright green and deeply veined leaves. Pinkish white flower of large size abundantly in early spring. It bears apple-like fruits with large nut kernels from which famous Tungo oil produced. Annual importation of this oil from China is said to amount to several million dollars. Commercial planting of this plant is now going on extensively in Florida and the Gulf States and most promising. However, just a simple ornamental tree we recommend very highly. It is a rapid grower and suitable for shade tree too.

3-4 feet (S) field grown	1.00	7.50
4-5 feet (S) field grown	1.50	10.00
5-7 feet (S) field grown	2.00	15.00

CORNUS FLORIDA RUBRA

Pink flowering Dodwood.

4-6 inch (C) (T)	1.25	10.00
12-18 inch (G) field grown	4.00	35.00
18-24 inch (G) field grown	5.00	45.00

HYDRANGEA (Assorted Otakusa and French Varieties)

8-12 inch (C) (TT)	1.25	10.00
12-18 inch (C) (TT)	2.00	15.00

LAGERSTROMIA INDICA (Crape Myrtle)

One of the most favorite flowering shrubs of the south, although it is rather too common. Hardy and heavy bloomer for long period. It paints landscape in summer with its brilliant blossoms in tones of many different shades, being called "Southern Lilac". As avenue trees considerable planting has been going on last several years and demand growing year after year very rapidly. We offer this season the following colors: Crimson, white, lavender and dark red.

12-18 inch (C), field grown	1.25	9.00
18-24 inch (C) field grown	1.50	12.00

LESPEDEZA FORMOSA

Purple bush clover, half shrub. Long arching branches growing usually about three feet. Rosy purple pea-like flowers in long drooping cluster. Blooms twice in a year, spring and fall, in the South. Very useful plant for border.

12-18 inch (S)50	3.00
18-24 inch (S)75	5.00

LESPEDEZA JAPONICA (Formosa Albiflora)

Pure white flower and much larger growth than purple flowering species. It is surely pretty sight when blooming.

Small clump, 3-5 eyes75	5.00
Medium clump, 5-10 eyes	1.00	8.00

MAGNOLIA LILIFLORA

Flower of lily shape in darkest purple at outside, and creamy white at inside. It blooms slightly later than Soulangiana.

	10	100
4-6 inch (C) from 2½ inch pots	2.50	20.00
6-8 inch (C) from 2½ inch pots	3.00	25.00

MAGNOLIA SOULANGEANA

Chinese Saucer Magnolia. Flower, white with rosy pink at base of petals. It blooms in profusion before leaves appear.

MAGNOLIA SOULANGEANA HYBRID

Propagated from seedling plant in superior character; flowers are in the same type to Soulangeana but larger in size and less pink; some of them just like Soulangeana Alba. Leaves very large and roundish.

12-18 inch (G), field grown	8.00	70.00
18-24 inch (G), field grown	10.00	90.00

MALUS BECHTEL (Double Pink, Slow Grower)

10-12 inch (G), field grown	2.00	15.00
12-18 inch (G), field grown	2.50	20.00

MALUS FLORIBUNDA (Single Pink)

MALUS NIEDZWETZKYANA (Red)

MALUS SPECTABILIS (Double Pink)

MALUS EXCELENCA THELL (Weeping, Pink)

12-18 inch (G), field grown	2.00	15.00
18-24 inch (G), field grown	2.50	20.00

VIBURNUM TOMENTOSUM (Japanese Snow Ball)

Most beautiful white flowers in ball. It thrives well in the South where American Snow Ball fails to do so.

4-6 inch (C) (T)	.75	6.00
6-8 inch (C) (T)	1.00	8.00
8-12 inch (C) (T)	1.25	10.00

BIGNONIO SPECIOSA

An evergreen vine with glossy leaves. Flowers in cluster, large purple.

8-10 inch (C), 2½ inch pots	1.00	8.00
-----------------------------	------	------

EPIGAEA REPENS

Ground Laurel or Mayflower. A small evergreen Creeper with leatherly dull green foliage. It produces early in leatherly dull green foliage. It produces early in spring, auxiliary clusters of small rose colored flowers that are remarkable with their spicy fragrance.

It is one of the best ground covers in a place where it's very shady. It grows wild in the woods of the South and Eastern parts of the country, but hard for transplanting. We offer here nothing but acclimated and cultivated plants which stand shock of removal. 3-5 runner; some have buds, from 3-inch

pots	10	100
	2.00	15.00

EUONYMUS RADICANS (Winter Creeper)

A fine evergreen creeper with small shiny green foliage.
Very hardy.

6-8 inch (C) (T) -----	10	100
8-10 inch (C) (T) -----	.50	4.00

EUONYMUS RADICANS ARGENTO-MARGINATUM.

Similar to the above but with foliage beautifully variegated in green and creamy white.

4-6 inch (C) (T) -----	.75	6.00
6-8 inch (C) (T) -----	1.00	8.00

FICUS REPENS (Climbing FIG)

Though it is not very hardy, one of best climbers, if not the best, known in the South, to cover stone or brick walls as well as rocks.

10-15 inch, 2½ inch pots -----	.75	6.00
Shipped by bare root as it grows very easily and safe.		

HEDERA HELIX (English Ivy)

We have two kinds of stock. One big leaved and the other small. Specify when you order which one you prefer.

8-12 inch (C) (T) -----	.75	5.00
8-12 inch (C), 2½ inch pots -----	1.00	6.00

KADZURA VINE

Evergreen trailing viney plant with thick leathery foliage which is dark glossy green in color. Flower is whitish rose but small and not showy. However, when clusters of scarlet berries ripen in autumn contrast with the dark green lustrous persistent leaves presents a most attractive effect. It is not very hardy and not recommendable for outdoor planting with exception of Florida, California and warm sections of the Gulf Coast. Yet we strongly recommend as a pot plant or for conservatory setting.

12-18 inch (C), from 3 inch pots -----	1.50	12.00
--	------	-------

MITCHELLA REPENS (Commonly called "Partridge Berry")

This little native plant is a beauty of all seasons. Beginning its show with slender trailing stems covered with tiny green foliages, small white or flesh colored flowers with pleasant odor, peeping under the leaves at April and May is undoubtedly cutest view. Still better display can be seen, however, in winter time when bright red berries appear to the scene to accomplish its grand show. This is an ideal plant for miniature or dish garden.

3-5 stems, some have berries, from 2¼ inch pots -----	10	100
	1.00	6.00

TRACHELOSPERMUM JASMINOIDES (Star Jasmine)

Finest vine to cover arbor, pagoda or screen. Leaves roundish oval, thick shiny green. Star shaped white flower very fragrant. Grand is the view when fully bloomed. If properly trained this is better pot plant than English ivy.

12-18 inch (C) (T) -----	1.25	10.00
18-24 inch (C) (T) -----	2.00	15.00

CANNA

King of Humbert Red (Red); Flame Bean (Yellow); President (Bright Red); Nokomis (Dark Red)	10	100
Prices for above varieties	.50	3.00

YELLOW FRINGED ORCHID (*Habenaria Ciliaris*)

An exceedingly handsome native orchid with lance shaped leaves and a large many flowered spike of showy golden or orange yellow flowers at July and August. It easily thrives in meadow and wet places.

WHITE FRINGED ORCHID (*Habenaria Blephariglottis*)

Similar to Yellow flowering orchid, with exception of color of flower which is pure white and very showy.
Blooming Bulbs

1.00 8.00

HEMEROCALLIS (Day Lily)

Single and double assorted.		
Small division	2.50	
Medium Division		5.00

LIATRIS (Blazing Star)

Two different colors of the flowers in this plant, purple and white. White flowering Liatris is slightly shorter but much stouter than purple one and blooms earlier. As it has been growing wild, no particular attention was called so far. If planted in mass, however, its effects are wonderful; not only showy but appearance is unusual also.
Blooming bulb

.75 5.00

OPHIOPOGON JAPONICA

Dwarf evergreen grass, thrives well in shady place where no other plants can grow.

Small Division	2.00	
Medium Division		3.00

OPHIOPOGON JABURAN AUREA VARIEGATA

A most beautiful and useful plant as house plant, also as border outdoor in the South. Its deep violet-blue flowers freely produced in dense spike nearly all summer are inevitable. Deep blue berries about the size of currants show excellent contrast to the drooping broad grass-like leaves striped with green and creamy white.
Medium Clump

3.00 25.00

POMPAS GRASS (*Cortaderia Argentea*)

The finest of all ornamental grasses. A beautiful evergreen foliage gracefully recurved. In fall it produces tall, silvery plumes which are very distinctive and graceful.

Small Division	1.00	8.00
Medium Division	2.00	15.00

MISCANTHUS JAPONICA ZEBRINA

A beautiful ornamental grass, foliages of which being nicely variegated.

Small Division	.50	4.00
Medium Division	1.00	8.00

COCOS AUSTRALIS (Pindo Palm)

One of the hardiest palms with its graceful shape with grayish green, curved pinnate leaves.

SPECIMEN PLANTS

Plants under this heading are growing in the field, twice or more transplanted or roots pruned, compact symmetrical shape of being sheared or pinched. As they are growing on our well drained high land and have abundant fiberous roots they suffer therefore much less from transplanting. Dig them with utmost care of our skilled laborers, balled and burlapped or puddled with clay immediately, so to take no risk of root getting dry. If so desired plants may be shipped without B. & B. (Balled and Burlapped). Prices listed here include charges of B. & B. unless otherwise mentioned. Packing charges are extra at cost, if order not accompanied with cash. Unusual attractive discount will be allowed on B. & B. stock for car load order or order delivered at our nursery grounds without boxing for application.
